

when President Carter selected me to head the VA, in no small part because of the strong recommendation of Alan Cranston.

I hope this short discourse makes it clear the debt of gratitude that I personally owed to Senator Cranston, but more importantly, it is indicative of the kind of man Alan was: dynamic, thoughtful, compassionate. He touched many lives, including veterans who benefited from his tireless commitment especially on behalf of Vietnam era veterans, future generations of Americans who today and for all time to come will benefit from his far-sighted commitment to the protection of our land, air and water and for citizens of the world who benefit from his long-time commitment to world peace, a cause he continued to pursue till the end of his life through the Global Security Institute.

Another part of the Cranston legacy is perhaps somewhat less known to the general public: his efforts on behalf of the disabled. When Alan Cranston came to the Senate in 1969, those with disabilities had virtually no legal protections against various forms of discrimination and indeed faced many barriers, physical and otherwise, to just getting in to the halls of government. To Alan Cranston, that was unacceptable. He led the efforts to enact the landmark Federal Rehabilitation Act of 1973 which outlawed discrimination against the disabled in all federally funded programs.

Among its many provisions, the 1973 law: Required federally funded buildings to be made accessible; promoted the hiring and advancement of qualified persons with disabilities by the Federal Government; and established the Architectural and Transportation Barriers Compliance Board, which has responsibility for setting standards for accessibility and for assisting and enforcing compliance with accessibility laws. I was honored to be named to that Board by President Carter in 1979.

Throughout the remainder of the 1970's Alan worked to revamp federally assisted State vocational rehabilitation programs by his sponsorship of laws that gave priority to the most seriously disabled and, most importantly, required a focus and follow-through on employment. In 1980, he sponsored successful legislation to make these same improvements in vocational rehabilitation programs for veterans. And in 1990, Senator Cranston was a leading co-sponsor of the Americans with Disabilities Act, which in many ways was a culmination of two decades of leadership by Senator Cranston on behalf of fairness and opportunity for persons with disabilities.

It was a great honor to have known and worked with Alan Cranston. Our country is a better place because of his achievements, which we celebrate today.

ADDITIONAL STATEMENTS

NATIONAL INSTITUTE OF STANDARDS AND TECHNOLOGY

• Mr. SARBANES. Mr. President, I rise today to commemorate the Centennial Anniversary of the National Institute of Standards and Technology in Gaithersburg, which will occur on March 3, 2001.

NIST and its scientists, researchers, and other personnel have a tremendous list of accomplishments over the last 100 years. Through its support of industry and its development of critical technology measurements, standards, and applications, NIST has played a critical role in our Nation's technological advances and, indeed, has helped to revolutionize the U.S. economy.

Initially founded as the National Bureau of Standards, NIST is our Nation's oldest Federal laboratory. In fact, the Institute's mission was first stated in the Articles of Confederation and the U.S. Constitution, making it as old as the Republic itself. The initial purpose of the Institute was to establish authoritative national standards of quantities and products. In its first three decades, NIST mainly served industries working to modernize by improving physical measurements, standards development, and testing methods. During this time, the Institute played an instrumental role in the creation of such critical 20th century innovations as the measurement of electricity, improvement of product assembly techniques, development of the aviation and automobile industry, and the creation of the radio.

After aiding the military effort during World War II, the National Institute of Standards and Technology and its workforce helped to develop many of the scientific innovations that have enabled our modern economy to flourish. NIST was able to foster and improve measurements of temperature, force, time, and weights. These and other technical improvements enabled the U.S. space program, aviation and naval industries, and perhaps the most importantly, the computer industry to excel.

In 1988, in part to emphasize its diverse range of activities, the National Bureau of Standards was renamed the National Institute of Standards and Technology. Today, the Institute continues to act as a behind-the-scenes specialist in the systems and operations that collectively drive the U.S. economy, including satellite, communication and transportation networks, and our laboratories, factories, hospitals, and businesses.

Over the years, I have had the opportunity to work closely with a number of individuals at the National Institute of Standards and Technology and I can personally attest to the high caliber,

quality, and commitment of its workforce. NIST employs many of our Nation's most dedicated and talented scientists, as is evidenced by its legacy of a number of Nobel-Prize winners.

More recently, I along with the rest of the Maryland delegation have worked with the Institute on a comprehensive ten year initiative to upgrade its laboratory infrastructure, which is expected to be completed by the year 2004. It is our hope that through this effort, with upgraded facilities, to match the quality of its personnel, NIST will be able to continue advancing the scientific and technological infrastructure of U.S. industry into the 21st Century.

Again, we take great pride in the accomplishments of the National Institute of Standards and Technology, in the people that work there, and in having the Institute in Maryland. I commend NIST for its 100 years of success and remarkable achievements and am confident that it will continue its remarkable track record of advancing science and technology for hundreds of years to come.●

SONNY O'DAY

• Mr. BAUCUS. Mr. President, on February 7, 2001, the State of Montana bid farewell to a favored son from Laurel, Montana. "Sonny O'Day," the Kid from Meaderville, was a local hero and businessman who held his family, friends and fans close to his heart.

SONNY O'DAY (CHARLES A. GEORGE), 1913-2001

Sonny O'Day, the Kid From Meaderville, boxed his final round, hung up his gloves, snuffed his famous stogie, and exited the ring quietly in his sleep on Wednesday, January 31.

Sonny, whose legal name was Charles Augustus George, was born Carlo Giorgi on March 8, 1913, to David and Rosa, Ragghianti, Giorgi in Lucca, Italy. His father was killed during World War I. Rosa emigrated to America with her three children to marry her brother-in-law, Angelo Giorgi, in 1920. They passed through Ellis Island, where the family name was Americanized to "George," and took the train through the vast expanses of their new country to the Montana mining community of Meaderville, in Butte.

Sonny loved all sports and was a natural athlete. Starting to box as a 10-year-old, Sonny was a protégé of Butte's Pat Sullivan Boxing Club. He represented the club in amateur fights throughout the State. He also was an avid football player, swimmer and diver. The City Championship football photograph of his Franklin School team was proudly displayed in his Wall of Fame.

Sonny was privately religious and moral, and proudly remembered his years as an altar boy at St. Joseph's Parish.

His life-long commitment to family began early when he held his dying mother in his arms at age 14. After her death, Sonny gathered his younger sister and invalid stepfather, Angelo, escorting them back to the family villa in Italy. After Angelo's death, Sonny immediately returned to the U.S. to avoid being conscripted into Mussolini's army.

Upon returning from Italy in the early 1930's, the 16-year-old orphan arrived in New York City, where he was told his pugilism could earn him money. He paid his dues sleeping in an Eastside gym and in Central Park in order to get his big break. Lying about his age, he fought amateur bouts until an agent spotted him and said, "You've got talent, kid, but the Irish control the game. Nobody is gonna come see an Italian boxer!" Sonny's reddish hair and freckles were the perfect fit to a new identity—Sonny O'Day—and new birthdate—St. Patrick's Day.

Spanning the next 17 years, welterweight Sonny fought 529 fights, lost 32 and had, as Sonny used to say, "some draws and the rest wins," in Madison Square Garden, Sunset Garden, and other major venues throughout the United States. He first met World Heavy Weight Champion Jack Dempsey when he refereed one of Sonny's early fights.

Living by the adage: "Smile and the world smiles with you, cry and you cry alone," Sonny was known to greet strangers with his famous smile, booming voice, crunching handshake, and the introductory greeting, "Shake the hand that shook the world!"

His love of Butte was as strong as his handshake. He rarely called the city by name. To him, it was "The Sacred City," and Butte cherished him in return, calling him "The Mayor of Meaderville," "The Meaderville Phantom," and "Butte's Boxing Star."

Sonny took his professional boxing earnings and opened two famous Butte nightclubs in the late 1930's: The Savoy and Melody Lane. There, he entertained sports and Hollywood greats including Gene Tunney, Cary Grant and Barbara Hutton.

He proudly served the U.S. Army during World War II, and married Carra Burton on September 20, 1944, while stationed in Gadsden, Alabama. The couple returned to Montana after the war where he established his bar and tavern in Laurel.

Sonny O'Day's "Boxing Hall of Champions," complete with a boxing ring, was his passion. He entertained beneath his pictures and memorabilia with stories that rhapsodized his listeners. He loved every minute of it, and bragged that he would never retire. Children came in for free candy, and parents came in for Sonny to give the kids their first lessons in self-defense. Sonny's bar was a local tourist attraction for years, and is listed as one of Montana's favorites in a number of publications.

Sonny's St. Patrick's Day celebrations were legendary for thousands of fans who descended on the community. It was customary for the Governor—Republican or Democrat—to call Sonny on St. Patrick's Day to wish him happy birthday. In 1986, Governor Ted Schwinden decided a phone call wasn't good enough, and came to Laurel to host Sonny's St. Patrick's Day party. The Laurel Chamber of Commerce surprised Sonny on St. Patrick's Day 1995 by honoring him for 50 years of business. The highlight was a celebrated bout between Sonny and special guest Todd Foster, fellow Montana boxing welterweight and 1988 Olympian. Foster allowed Sonny his final knockout punch for the "Downtown Laurel Businessmen's Crown."

In 1952, Golden Gloves Boxing came to Montana, and Sonny helped train these young fighters. At the Shrine Temple in Billings, Golden Gloves championships of an eight-State region took place, and Sonny refereed the very first bout and many more over the years.

When boxing turned professional in Montana, Sonny served on the State Athletic

Commission for 26 years under seven different governors. This led him to bring 77 professional bouts to Montana, including three world championship fights. As chairman of the Commission, he promoted the Gene Fullmer-Joey Giardello Middleweight Championship of the World title match on April 29, 1960, in Bozeman.

Basements and gyms all over Billings and Laurel were the sites for years to come as Sonny trained young fighters. He estimated that he helped develop 2,500-3,000 fighters during those years.

The Student Council of Eastern Montana College, now Montana State University-Billings, originated the annual Sonny O'Day Smoker, a fund raiser that entertained the greater Billings area from 1975-81.

Sonny's civic community service included 30 years as a Kiwanian, including service as a State Lieutenant Governor; a lifetime member of the Elks; and a founding member of the Montana Gambling Commission. Although he was a professional boxer, he did not believe in corporal punishment, and his daughters fondly remember they never received anything but love from "those registered hands!" Whenever the mines in Butte went on strike, he would spearhead caravans of trucks to take food and presents to the miners. He never forgot to feed the alley cats—even on holidays. For a man who had earned his living by the "manly act of self-defense," as Sonny called it, those who knew him saw a gentle soul who lavished kisses and never hesitated to cry tears of sadness or joy.

His love of cooking was legendary, and no one could enter his home without being invited to dinner. His family never knew who Sonny would bring home to dinner. Jack Dempsey, Sugar Ray Seale, numerous governors and senators, including Mike Mansfield, sat at the family table in Laurel.

Sonny never forgot his Italian roots, and continued to visit and support his sister and her family in Lucca until her death. Visits to the family villa in Lucca rejuvenated him. He was especially proud of the family legacy: The Ragghianti Art Museum, renowned in the province of Tuscany.

Sonny is survived by his wife of 56 years, Carra Burton George; his three daughters: Mary-Glynn, Terry, Cromwell of Missoula and grandchildren Charlie, Lauren and David; Nancy, Sam, Talboom of Green River, Wyo. and grandchildren Justin, Carlee, and Jake; and Shelley, Larry, Van Atta of Billings and grandchildren John, Nick, and Marissa; sister-in-law Lois George and her children Michael and Mary Grace, of San Diego, Calif.; and nieces Elisa Mussi and Lalla Volpi, and nephew Carlo Volpi, of Lucca, Italy. He was preceded in death by his parents; brother Gus George; sister Mary Volpi; and son-in-law John Pingree.

God surely must be dancing in Heaven, knowing you're joining Him, Sonny; just as you surely will tell Him, "It's all in the footwork."

IN HONOR OF THE FIFTH GRADERS AT SHOEMAKER SCHOOL IN MACUNGIE, PENNSYLVANIA

• Mr. SANTORUM. Mr. President, I stand before you today to recognize a select number of outstanding students from Macungie, Pennsylvania. I was honored to hear of a tremendous service that these fine young boys and girls did at Shoemaker School in November of last year.

Seventy-five fifth graders in the Community Service Club of Shoemaker School conducted a walk-a-thon to raise money for paralyzed veterans across the United States through the Paralyzed Veterans of America. The walk-a-thon occurred over several school days, where the children walked during breaks during the school day. Some children even sacrificed their lunches and walked in the rain and cold weather just to raise a few more dollars.

These fine young Americans set a wonderful example to men, women, and children everywhere. With a little initiative and a lot of heart, the fifth graders at Shoemaker School were able to help paralyzed veterans throughout our great Nation. I commend each and everyone of these dedicated, selfless children, and it is an honor for me to recognize them today. •

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Ms. Evans, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT ON THE EMERGENCY DECLARED WITH RESPECT TO THE GOVERNMENT OF CUBA'S DESTRUCTION OF TWO UNARMED U.S. REGISTERED CIVILIAN AIRCRAFT IN INTERNATIONAL AIRSPACE NORTH OF CUBA ON FEBRUARY 14, 1996 IS TO CONTINUE IN EFFECT BEYOND MARCH 1, 2001—MESSAGE FROM THE PRESIDENT—PM 6

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Banking, Housing, and Urban Affairs.

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination of a national emergency unless, prior to the anniversary date of its declaration, the President publishes in the *Federal Register* and transmits to the Congress a notice stating that the emergency is to continue in effect beyond the anniversary date. In accordance with this provision, I have sent the enclosed notice
